### OVERVIEW

This training series is for physicians, nurses, physician assistants, social workers, case managers, and clinic administrators who work in primary care settings and who wish to enhance their knowledge and competencies in providing high-quality, sensitive, and effective HIV risk assessment, testing, and diagnosis to gay or bisexual men, or other men who have sex with men (MSM).

### OBJECTIVES

At the completion of this program, participants should be able to:

- List key elements that comprise identity for Black and Latino MSM
- Explain how racial and sexual discrimination influences behavioral risk in Black and Latino MSM
- Explain how racial and sexual discrimination against Black and Latino MSM influences their healthcare utilization, HIV testing, and communication with providers
- Describe strategies for engaging Black and Latino MSM in HIV risk assessment, counseling, and testing
- Identify skills and competencies to improve provider-client relationship with Black and Latino MSM
